12th (Commerce)	Gujarat Secondary & Higher Secondary Education Board	2020	60%

TECHNICAL SKILLS

Programming: Java, Python, SQL, JavaScript
Frontend: HTML5, CSS3, Bootstrap, React.js
Backend: Node.js, ASP.NET (C#)
Databases: MySQL, PostgreSQL, MongoDB, SQLite
Tools: VS Code, Android Studio
Concepts: OOP, DBMS, Software Testing, Manual Testing, Debugging

ACADEMIC PROJECT

Online Movie Ticket Booking System | ASP.NET, MySQL
A web application that allows users to register, browse movie shows, and book tickets online.

- Designed and developed the application using ASP.NET, with MySQL as the backend database.
- Implemented user Login and Logout functionality, allowing each user to securely access their own account.
- Built a Theater & Show listing page where users can view available movies and showtimes.
- Developed the ticket booking flow, connecting show selection through to a Payment confirmation screen (UI simulation).

AI Interview Simulator – Personalized Mock Interview Platform | Frontend React.js,HTML5,JavaScript,Bootstrap

Backend-Python

Database-MongoDB

A web-based AI-powered interview preparation platform that conducts personalized mock technical and HR interviews, evaluates user responses, and provides detailed feedback with performance analytics.

- Designed and developed a full-stack web application using React.js for the frontend and FastAPI (Python) for the backend.
- Integrated Google Gemini API to generate role-specific interview questions and evaluate user responses in real time.
- Implemented user authentication (Login/Register) and maintained interview history securely using MongoDB.
- Built an interactive dashboard displaying interview scores, strengths, weaknesses, and progress reports with graphical analytics.
- Developed modules for technical and HR interviews, allowing users to select job roles and difficulty levels while receiving AI-generated improvement suggestions.
